

The diagram shows a class box for **dataBaseManager**. The box is divided into three horizontal compartments. The top compartment contains the class name **+dataBaseManager**. The middle compartment contains a list of attributes: `- instance: dataBaseManager`, `- connectionString: String`, `- user: String`, `- password: String`, `- pdb: String`, and `- server: String`. The bottom compartment contains a list of methods: `- dataBaseManager()` and `+ getInstance(): dataBaseManager`. To the right of the class box, there is a rectangular box representing another class, which is partially visible and has a line connecting it to the `instance` attribute of the `dataBaseManager` class.

+dataBaseManager

- instance: dataBaseManager
- connectionString: String
- user: String
- password: String
- pdb: String
- server: String

- dataBaseManager()
- + getInstance(): dataBaseManager
